

Ease the pressure with **Comfort Matting**

DariTech's Comfort Matting is soft, durable and easy to install. There's no better way to ensure a sure footing.

It's been shown that when given a choice cows prefer to stand on rubber rather than concrete.

DariTech Comfort Matting simulates the softness of grass - relaxing hooves and legs, and helping your cows feel natural and at ease.

The surface has a hammer-tone texture, assuring a non-slip and non-absorbent walking and waiting space.

The bottom is grooved, providing extra give and making cleanup quick and easy.

Walk, wait, eat, drink - repeat. Cows today have a rigorous routine. Help take the pressure off with DariTech Comfort Matting.
