

Rotary BacTrol

Bacterial Control System

Fully adaptable to any Rotary Parlor!

Bactrol Control

The Bactrol System is easy to install and very low maintenance. The system can be used with backflush style claws in the milking position. Package includes all controls, valves, and sweep tanks. Does not include piping, brackets, chemical pump, or rotary hubs.

Iodine, ozinated water, or chlorine are options for this system.

System components may be covered

under one of the following patents:

Patent # 6,997,135

Patent # 6,105,536

Additional patents applied for.
