

The Auto Dipper

“The Labor Saver”

Operating your rotary parlor can now be an efficient one-man job. As each cow leaves the parlor, the Dipper's arm senses when and where to spray, eliminating the necessity for an extra man. Spray setting is adjustable in 1/10th of a second increments, enabling precise control of dip consumption. With a safe soft-air operation and a flexible wand, it's always cow friendly. The Auto Dipper is an excellent way to improve efficiency, reduce labor costs, and maximize your parlor's production.
