

MINI BIOLYNK

by **DARITECH**

With this patented system your holding pen, sort lane, and transfer lane can be flushed clean 24 hours a day. All of this can be accomplished on a scrape dairy with no separator and no added water!

But don't just take our word for it ...

LESS LABOR

Before the Mini Biolyнк we would scrape transfer and holding pen lanes on our 1600 dairy cow farm with a tractor. The automation of the Mini Biolyнк allows us to flush as frequently as we would like. The dirty water is being used from six different locations to be recycled and used in the Mini Biolyнк System. This system is saving us a lot of time.

- Galen Smith (owner)
Coldstream Farms, Deming, WA

LESS WATER

The main reason for purchasing the Mini Biolyнк is because we have to hold water for six months during winter. We were using fresh water to flush pens. Now by installing the Mini Biolyнк, we are using recycled water which is saving us 40,000 gallons of water a day. Not only are we saving water but it is doing a much better job of flushing the pens.

- Bernie Teunissen (owner)
Beranna Farms, Caldwell, ID

CLEAN COWS

We went with the Mini Biolyнк flush system for its ability to flush the holding pen as frequently as we want, all while conserving water. An added benefit is keeping our cows feet clean before entering our new parlor.

- Keith Golob (owner)
Golob Farms, Granger, WA

Manure Pumping

Our GreenLine manure pumps follow in the Daritech tradition of bringing value to dairies throughout North America by providing long wearing, highly efficient solutions to the many challenges that manure management presents. Our manure pump line offers a broad selection with innovative features for demanding dairy applications including vertical pit pumps, agitators, mixing pumps and dairy flush pumps. With the ability to configure our pumps for a wide range of flow rates and manure consistency, we can help you manage your manure pumping requirements regardless of the size of your dairy.

Greenline 250 pump skids

Greenline 250 Autoprime

Greenline E-Series Vertical Pumps

Flush Systems

Our flush valves are built to last with the highest efficiency. When combined with our BioLynk system, you will get consistent, high quality flush water all year long.

Automated Controls

Built in our own ETL Listed panel shop, our industrial PLC touch screen interface provides high end control of all our automated equipment. Our systems can feature mobile device monitoring and control, text message alerts, and remote technical support.
