

DT BAR SCREEN

Daritech Bar Screens are crafted to provide reliable debris removal in the most demanding environment. Integrating advanced engineering, expertise, and durable construction into our designs.

These bar screens are tailored to fit perfectly in canals or wastewater intake openings, utilizing hot dipped galvanized carbon steel for enhanced durability. Our innovative bolt-on design allows for straightforward maintenance of the rake teeth, ensuring minimal downtime.

- **Heavy-Duty Materials:** Features hot-dipped galvanized grates that withstand severe weather and heavy debris loads.
- **Resilient Electric Motors and Speed Reducers:** Sized specially for heavy-duty applications and built to perform reliably in tough conditions.
- **Multiple sizes available to fit the needs of your dairy:** Available in 2' length increments: 8' - 24' Widths Available in 2', 3', and 4'.

See your local dealer to have length sized appropriately for your application.

BENEFITS:

- **Effective Debris Removal:** Engineered to manage the most demanding loading conditions with ease.
- **Quality U.S. Manufacturing:** All bar screens are produced in our facility to uphold high standards.
- **Maintenance-Friendly Design:** The bolt-on tooth system allows for quick and efficient maintenance.

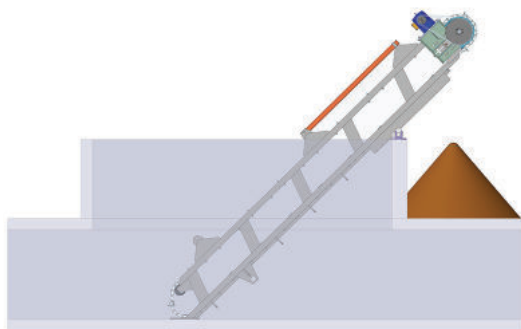

FEATURES:

- **Powerful Motors:** Specifically engineered for exceptional performance in adverse conditions.
- **Robust Design for Challenging Debris:** Built to effectively handle large debris while resisting harsh weather.
- **Custom Automation Options:** Seamless integration with dairy flush or flume pumps for optimal debris management.
- **User-Friendly Maintenance:** Parts are designed for easy replacement to simplify upkeep.
- **Real-Time Monitoring:** Provides insights into operational status for efficient management.
